

16.09.2021

To Whom It May Concern,

We are writing on behalf of Avondale Park & St Anne's Federation in support of The Royal Borough of Kensington and Chelsea (RBKC) Council proposal for the 2030 Future Neighborhood's application in Notting Dale.

We therefore confirm that we would like to partner with the Council to support with engaging the community and delivering a series of initiatives and together as part of this application, such as:

The main objectives are to reduce our energy consumption and work towards becoming carbon neutral on the soonest date possible and before 2027 at the latest.

- Our organisation is working on reducing the use of our carbon emissions.
- The Council has partnered with us to replace our boilers, insulate our school, remove asbestos and replace our windows.
- We worked with the Council to build our new Nursery attached to our Victorian building in an energy efficient and environmentally friendly way
- Upon successful completion of previous projects the council will support us in achieving our collective objective.

We strongly support this application which will not only tackle environmental issues in a holistic way; but will embed green recovery at the heart and bring benefits for the community, particularly support the most disadvantaged residents and unrepresented groups in Notting Dale.

Through this letter, we acknowledge specific roles and responsibilities we will fulfil in this partnership such as working with the council to achieve their Carbon2030 objective. We have been working with RBKC for a long time in order to maintain our existing Victorian property and enhance its features in an environmentally focused way.
