Reference for GLA 2030 Future Neighbourhoods Application – Letter of Support

To Whom It May Concern,

I write in my capacity as Managing Director of Asset Plus in support of the Royal Borough of Kensington and Chelsea Council (RBKC) proposal for the 2030 Future Neighbourhoods application in Notting Dale.

We strongly support this application and commit to working with RBKC in the delivery of the Schools Retrofit Programme – The Route to Decarbonisation for Primary Schools, as part of Phase 2 of Notting Dale Future Neighbourhoods 2030 programme.

Asset Plus has been appointed in August 2022 by Kensington and Chelsea Council through the Mayor of London Retrofit Accelerator Framework to identify relevant energy efficiency and deep retrofitting measures that can be done in the 37 buildings included in the programme.

The Retrofit Accelerator Programme aligns with the commitments made in the Council's Climate Emergency Action Plan (2022-2027) and the Green Plan. The main aim of this programme is to retrofit buildings that are fit for the long term and to create healthy, durable, and resilient buildings that are adapted for climate change and take a whole building approach towards decarbonisation. This will support with reducing carbon emissions at pace and with achieving the 2030 carbon neutral targets.

Asset Plus are a UK independent provider of energy reduction and zero carbon generation measures who enable organisations and entities to adopt these trends as a route to achieve NET ZERO carbon emissions.

Working throughout the United Kingdom and Ireland, Asset Plus is founded and underpinned by core values of excellence, passion, integrity, hard graft and collaboration through building trusted relationships with clients, employees and suppliers.

www.asset-plus.com

A sector recognised, award winning project partner for developing and delivering energy and zero carbon infrastructure upgrades on behalf of organisations and entities across both the public and private sectors.

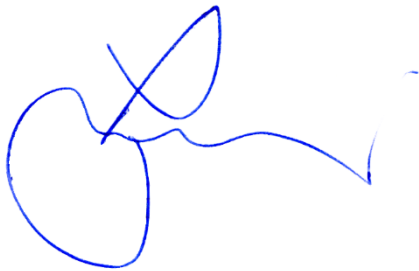

We strongly support this application which will not only tackle environmental issues in a holistic way and support with decarbonising the schools' buildings; but will embed climate change and sustainability within the curriculum, encourage behaviour change and improve comfort for pupils and schools staff.

Through this letter, we acknowledge specific roles and responsibilities we will fulfil in this partnership.

We have currently prepared to submit a Phase 3b Public Sector Decarbonisation Scheme Application which will act as match funding.

I confirm all the above information is correct. If you have any questions, please do not hesitate to get in touch.

Yours sincerely,

Paul Burnett
