Reference for GLA 2030 Future Neighbourhoods Application – Letter of Support

To Whom It May Concern,

I write in my capacity as Director of Urbanwise.London in support of the Royal Borough of Kensington and Chelsea Council (RBKC) proposal for the Mayor of London Future Neighbourhoods 2030 programme.

We strongly support this application and commit to working with the Council and other local partners in the delivery of the Climate Change Awareness and Education Programme. Following a long- standing relationship with the RBKC Climate Change Team, we have now committed to deliver two initiatives: 12 climate change and sustainability workshops and talks and 12 Community green walks and visits for adults and families.

The aim is to engage local residents and young people in learning about and taking positive action on climate change in their own community. This will benefit local people by improving their wellbeing and making the more connected to their neighbourhood and keen to participate in other Future Neighbourhood initiatives.

Our organisation is a charity and is based in north Kensington. We have strong links with the local community and two of our staff members are local residents. The main focus of our organization is climate change education for all. Through this letter, we acknowledge specific roles and responsibilities we will fulfil in this partnership. We also have a number of volunteers who support our activities at the Space centre where we will be running them which would provide added value.

Yours sincerely,

Key contact details: Moya O'Hara

Position: Director
