

Roof level cabling

Existing parapet wall

Existing cables

Under the proposed roof works, existing parapet walls will be raised, and cables will be replaced as new lengths are needed, and for efficient television reception to be received

Digital satellite channels

Existing satellite dishes around the building will be removed

Digital satellite channels

A box of a similar size will be installed in individual flats for integrated reception systems connected to receive digital satellite channels depending on residents' tv cable provider(s)

Proposed location of where new tv reception box will be installed

Bramley House: First floor plan
